-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Claim 1 recites the limitations "the pivotedly connected" in line 1, "the drive" in line 2, "the form" in line 2, "the vacuumization system" in line 4, "the mechanism" in line 4 and "the removable chamber" in line 5. There is insufficient antecedent basis for these limitations in the claim.

Claim 2 recites the limitation "the rigid chamber" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 3 recites the limitation "the bag" in line 2. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3725

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Tuttle (2,372,917). Tuttle discloses a device for corrugating sheet material (1) including a die system (2) comprised of split dies pivotally connected by fasteners (3,4). A vacuumization system (F,V,5,6) connects vacuum tubes (12-17) to perforations in die (2). A chamber (32) is selectively vented to atmospheric pressure through the tubes (12-17) in order to draw the material (1) against the die system annular grooves (23,24) in order to form corrugations.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tuttle (2,372,917) in view of RU 2118217. Tuttle does not disclose a subsidiary chamber comprising a bag. RU 2118217 teaches a bag (28) enclosing a die forming system. It would have been obvious to one skilled in the art at the time of invention to enclose the dies of Tuttle in a bag as taught by RU 2118217 in order to shape the material in an inert environment.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
